Dear PS 101 Families:

I am delighted to share some good news with you regarding the beautiful and upgrades to our school. After a long commitment to trying my best to obtain air conditioning throughout my school building, we are on our way! With a close partnership with our Assemblyman William Colton, we have achieved a goal to provide costly wiring and air conditioning units for our gymnasium. This marks the completion of our school building and ensures that every learning space within our building includes a cool, well-ventilated learning environment in which our students and staff feel comfortable and healthy.

We partnered with Assemblyman Colton and explained our needs and he promised and then delivered with a Capital Funding grant that will provide the cost of this upgrade. Our physical education, wellness and recreation programs will flourish and our asthmatic students will be able to enjoy their time in the gymnasium. We owe Assemblyman Colton a tremendous thanks for his tireless efforts and dedication to ensure 101's success. With city budget cuts and constraints, he managed to stay committed to this project and for this and much more, we are forever grateful.

With the new building extension in the works, PS 101 will shine brighter and will only get bigger and better for generations to come.

Sincerely,

Gregg Korrol
Principal
