Dear Parents/Guardians,

Please see the attached letter regarding lead in water.

It's very important that you note the following:

The water stations identified in this letter have been turned off for approximately 3 years and students have had absolutely no access to them.

The one exception is the spot identified in 312, which is an eyewash station for chemical burns. As we do not use chemicals in our science lab, students do not use the eyewash station.

While the letter must be sent to you, it is important you know your children have had no exposure to these fountains, which have been turned off since 2013.

Thank you,

Gregg Korrol

G.Korrol
