Khadijah Sabir

Age 10

1 month after being diagnosed

My Name is Khadijah Sabir, I am 10 years old, and in 5th grade. I suffer from chronic kidney failure for 1 year now. I am on peritoneal dialysis 7 nights a week. I am in need of a kidney from someone. My mom was a match, but after testing, it turned out she was pre diabetic so she was no longer eligible to give me her kidney. My dad has high blood pressure so he didn't qualify. I pray every day that God can send me someone to give me their kidney. I want to live a normal life like other kids my age. I like to read, write, and I also like drawing and making slime. I have been under the care of Dr. Eduardo Perelstein and his team. They all are so good to me and do everything they can to make my life a bit easy. I am the 2nd child out of 4. I'm unable to do many activities with my cousins and siblings because of the catheter I have in my abdomen. My family and my school P.S.177 have been trying to find a donor for me so I can get back to a normal life. My teacher Ms. Lamalfa, Assistant Principal Mr. Constantino, Ms. Laura from the main office, and many others have been so caring and loving to me. I love them all and am very grateful to them. At times I get very depressed especially when a lot of family is over because I see everyone is happy and healthy and I'm not. I wish someone can donate their kidney to me, so i can be normal again. After i receive a transplant I want to go to Disney Land for 1 week. I also want to go to six flags great adventure, and to the slime factory.
